

RUBRIC FOR NCM _104 -COMMUNITY HEALTH NURSING 1

Criteria	Exceeds Standards (9-10)	Meets Standards (7-8)	Approaches Standards (5-6)	Developing (3-4)	Beginning (1-2)	Score
Project Description	All parts of the project description are filled up with relevant information with/ shows evidence of applying the nursing process in relation to care for patients/family/community considering competent and safe nursing care planning appropriate to the identified health problems, potential risk and injury, threats and foreseeable crisis affecting health in the future.	Almost all parts of the project description are filled up with/shows relevant information with evidence of applying the nursing process in relation to care for patients/family/community considering competent and safe nursing care planning appropriate to the identified health problems, potential risk and injury, threats and foreseeable crisis affecting health in the future	At least half of the project description are filled up with relevant information with/shows evidence of applying the nursing process in relation to care for patients/family/community considering competent and safe nursing care planning appropriate to the identified health problems, potential risk and injury, threats and foreseeable crisis affecting health in the future	Less than half of the project description are filled up with relevant information with/shows evidence of applying the nursing process in relation to care for patients/family/community considering competent and safe nursing care planning appropriate to the identified health problems, potential risk and injury, threats and foreseeable crisis affecting health in the future	The parts of the project description are not filled up with relevant information with/shows evidence of applying the nursing process in relation to care for patients/family/community considering competent and safe nursing care planning appropriate to the identified health problems, potential risk and injury, threats and foreseeable crisis affecting health in the future	
Background and Objectives	The proposed project is comprehensively showing evidence/s of careful planning and deliberation which are tightly aligned to the school strategic directions and effectively addresses the concerns and issues identified in the community.	The proposed project acceptably shows evidence/s of careful planning and deliberation which are clearly aligned to the school strategic directions and effectively addresses the concerns and issues identified in the community.	The proposed project is adequately showing evidence/s of careful planning and deliberation aligned to the school strategic directions and effectively addresses the concerns and issues identified in the community.	The proposed project limitedly shows evidence/s of careful planning and deliberation is partially aligned to the school strategic directions and effectively addresses the concerns and issues identified in the community.	The proposed project does not show evidence/s of careful planning and deliberation and is not aligned to the school strategic directions and effectively addresses the concerns and issues identified in the community.	
Relevance	Highly relevant to the course and the subject which addresses all the needed information in an in-depth, complete manner; main points are clear, and evidence supports rationale; has a grasp of content and elaborates with explanation and examples of rendering care in emergency and critical situations.	Clearly relevant to the course and the subject; includes essential and accurate information that satisfactorily addresses the methods and strategies of rendering care in emergency and critical situations.	Relevant to the course and the subject; includes somewhat complete information that satisfactorily addresses the methods and strategies of rendering care in emergency and critical situations.	Partially relevant to the course and the subject which includes some essential information and begins to address the methods and strategies of rendering care in emergency and critical situations, but a great deal of information is not clearly connected.	Not relevant to the course and the subject which there is no essential information presented and it does not address the concerns that should be presented in the methods and strategies of rendering care in emergency and critical situations.	
Desired Impact	The long-term effects of the proposed project and the specific measures to sustain it are completely identified.	The long-term effects of the proposed project and the specific measures to sustain it are clearly identified.	The long-term effects of the proposed project and the specific measures to sustain it are adequately identified.	The long-term effects of the proposed project and the specific measures to sustain it are somehow identified.	The long-term effects of the proposed project and the specific measures to sustain it are not identified.	
Quality of Report	exhibits exemplary evidence of well-planned and logical presentation and all areas are clarified.	exhibits high evidence of logical presentation and most of the areas are clarified.	exhibits partial evidence of logical presentation and few areas are clarified.	exhibits noticeable evidence of logical presentation and few areas are clarified.	Does not exhibit evidence of logical presentation. All areas are not clarified.	
Manner of Presentation	shows exemplary evidence of mastery of the topic being discussed and with the use of appropriate language / required medium.	shows high evidence of mastery of the topic being discussed and with the use of appropriate language / required medium.	shows partial evidence of mastery of the topic being discussed and with the use of appropriate language / required medium.	Shows noticeable evidence of mastery of the topic being discussed and with the use of appropriate language / required medium.	does not show mastery of the topic being discussed and with the use of appropriate language / required medium.
